

# Boost your recycling!

Our electronics recycling service

**printwaste**  
Sustainable Recycling

# Electronics recycling.

As our society becomes increasingly digital, electronics, or WEEE (Waste Electrical and Electronic Equipment) as we like to call them, have become one of the fastest growing waste streams in the UK.

The problem is, they're no good as waste. Often containing hazardous substances, electronics can be extremely harmful to the environment if disposed of incorrectly. Because of this, businesses now have a legal responsibility to ensure that any WEEE they manufacture, distribute or use, is disposed of responsibly, in line with the WEEE Directive – and not doing so can result in significant fines. So, we're here to prevent this from happening and help you do the right thing with your WEEE.

### WHAT COUNTS AS WEEE?

WEEE refers to any end-of-life electrical and electronic equipment – basically any product with a plug or battery. Examples include:

White goods

IT equipment

Medical equipment

Cabling & lighting

TVs and games consoles

Mobile phones and tablets

Fridges & microwaves

### THE BENEFITS FOR YOU

-  **Breathing new life into materials** – We'll separate your electrical items into their individual parts and send these on for recycling, helping you boost your recycling rates and contribute towards a circular economy.
-  **No limits on quantity** – We're not fazed by quantity; we'll collect anything from a single computer to a whole warehouse full, and we'll do all the manual removal work on top.
-  **Total transparency** – From the moment we collect your electrical items to the moment they're recycled, we'll know where they are and what's happening to them, and so will you.
-  **Our commitment to quality** - Supporting businesses to recycle products into quality raw materials is our thing, so we can promise you a partnership based on getting the most out of your materials in the most sustainable way.
-  **Ease** – With flexible collection schedules designed to suit your business, and account management on-hand to support you, it couldn't be easier for you to recycle your electrical materials.

### EQUIPPING YOU WITH THE RIGHT STORAGE

To ensure your WEEE is stored correctly prior to collection, and in a way that's practical for your business, we have a comprehensive range of storage options for you to choose between.

From collecting loose, to storing your materials in bins and RORO containers, we'll help you find the right type and quantity to fit your space, WEEE output and collection frequency. And, in doing so, we'll ensure you're recycling in a way that's both economical and eco-friendly.

### Flexible collections to fit with you

**Pre-scheduled/Regular collections**  
Ideal for businesses who produce a steady stream of electricals, meaning your materials will be collected regularly without you having to think about organising anything.

**On-demand collections**  
Ideal for businesses who generate low volumes of electricals, or have peaks and troughs through the year. We can simply collect these as and when you need.

# Our services:

## Sustainable Recycling and Waste Services

Cans & metals

Cardboard

Plastics

Paper cups

Cartons

Hazardous waste

Non-recyclables

Wood

Non-confidential paper

WEEE

Polystyrene

Glass

Office & warehouse clearances

## Confidential Shredding Services

Archive clearances

Hard drives & media material

Confidential paper

Branded products, uniforms & clothing
