Sustainable Recycling

# Glass recycling.

Known for breaking easily, glass is often considered fragile and weak. But, as recyclers, we see this material a little differently. To us, glass is one of the strongest materials out there. This is because it's 100% recyclable and can be re-melted endlessly, over and over again, without any loss of quality.

It's a seriously sustainable material and, once in circulation, can remain so forever. However, until recently, the industry struggled to recycle glass because it needed to be separated into its individual colours (clear, green and brown).

Each colour needed a different bin and, for businesses with restricted site space, such as city centre pubs, restaurants and hotels, this was problematic. Luckily, thanks to advancements in technology, things have now changed and all glass bottles can be put into one single container, making it easier than ever to recycle. Separately, we can also collect and recycle plate glass which mostly comes from window glass.

## THE TYPES OF GLASS WE COLLECT:

Glass bottles and jars

Broken glassware

UPVC window glass

**Did you know?** One tonne of glass is made up of 3000-4000 bottles!

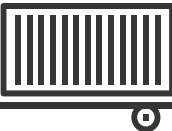

## THE BENEFITS FOR YOU

- \* **Breathing new life into materials** – We'll turn your glass items straight back into glass, helping you to contribute towards a circular economy, boost your recycling rates and meet your sustainability goals.
- \* **No limits on quantity** – We're not fazed by quantity; we'll collect anything from a wheeled bin of glass bottles to a RORO container full of window frames
- \* **Total transparency** – From the moment we collect your glass items to the moment they're recycled into new products, we'll know where they are and what's happening to them, and so will you.
- \* **Our commitment to quality** - Supporting businesses to recycle products into quality raw materials is our area of expertise, so we can promise you a partnership based on getting the most out of your materials in the most sustainable way.
- \* **Ease** – With flexible collection schedules designed to suit your business, and account management on-hand to support you, it couldn't be easier for you to recycle your plastics.

## EQUIPPING YOU WITH THE RIGHT STORAGE

Whatever the type and quantity of glass you have, we can supply you with specialist storage options to match.

For example, if you're a business producing small volumes of glass, we can provide you with easy-to-manoeuvre wheeled bins (fitted with brush filled aperture) or Ecosort bins. If you're a business producing bulk volumes, we can supply you with large containers, designed to hold heavier weights.

### Flexible collections to fit with you

**Pre-scheduled/Regular collections**  
Ideal for businesses who produce a steady stream of glass, meaning your materials will be collected regularly without you having to think about organising anything.

**On-demand collections**  
Ideal for businesses who generate low volumes of glass or have peaks and troughs through the year. We can simply collect these as and when you need.

# Our services:

## Sustainable Recycling and Waste Services

Cans & metals

Cardboard

Plastics

Paper cups

Cartons

Hazardous waste

Non-recyclables

Wood

Non-confidential paper

WEEE

Polystyrene

Glass

Office & warehouse clearances

## Confidential Shredding Services

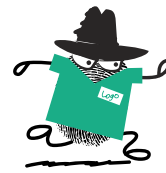

Archive clearances

Hard drives & media material

Confidential paper

Branded products, uniforms & clothing
