Sustainable Recycling

# Hazardous waste.

As the name suggests, the term “hazardous waste” refers to any materials that have the potential to cause harm to us or the environment (or usually both).

Understandably, because of the risks associated with these types of materials, as businesses, we all have a legal responsibility to handle them safely.

This means, when disposing of them, we must do so in accordance with the Hazardous Waste (England and Wales) Regulations 2005. And this is something we can help you with here at Printwaste. Our dedicated hazardous waste service has been specifically designed to dispose of your hazardous materials in the safest and most environmentally-friendly way, ensuring your business remains compliant and you get that all-important peace of mind.

THE TYPES OF HAZARDOUS WASTE WE COLLECT:

Examples include (but are not limited to):

Batteries

Fluorescent light tubes

Paints

Oily rags

Antifreeze

Aerosols

Electronics

solvents

Brake fluid

White goods

THE BENEFITS FOR YOU

- Breathing new life into materials** – Wherever possible, we'll safely turn your hazardous items into all manner of new products, helping you to contribute towards a circular economy, boost your recycling rates and meet your sustainability goals.
- A full service approach** – From carrying out site audits to the completion of hazardous waste notes, we'll ensure no area of your service is left untouched.
- No limits on quantity** – We're not fazed by quantity; we'll collect anything from a box of batteries to a warehouse full of electrical appliances, a drum of Printers ink to an IBC of x-ray developer.
- Total transparency** – From the moment we collect your hazardous items to the moment they're recycled into new products, we'll know where they are and what's happening to them, and so will you.
- Our commitment to quality** - Supporting businesses to recycle products into quality raw materials is our area of expertise, so we can promise you a partnership based on getting the most out of your materials in the most sustainable way.
- Ease** – With flexible collection schedules designed to suit your business, and account management on-hand to support you, it couldn't be easier for you to recycle your hazardous waste materials.

EQUIPPING YOU WITH THE RIGHT STORAGE

Because hazardous waste has the potential to cause harm if disposed of incorrectly, it's absolutely essential you have the right storage solutions in place for these types of materials. They need to be stored carefully, and in a way that keeps everyone safe. To ensure this is the case, we can provide you with the following storage options:

Batteries	Battery boxes
Fluorescent tubes	Fluorescent tube boxes
Paints or solvents	Loose to containers
Oily rags or aerosols	240L bins
Antifreeze or brake fluid	UN-approved 205L clip drums or IBCs (Intermediate Bulk Containers)
Electronics (WEEE)	Loose to containers (refer to WEEE information sheet for further details)

# Our services:

## Sustainable Recycling and Waste Services

Cans & metals

Cardboard

Plastics

Paper cups

Cartons

Hazardous waste

Non-recyclables

Wood

Non-confidential paper

WEEE

Polystyrene

Glass

Office & warehouse clearances

## Confidential Shredding Services

Archive clearances

Hard drives & media material

Confidential paper

Branded products, uniforms & clothing
