Sustainable Recycling

Plastics recycling.

Lightweight, durable and inexpensive, plastic is everywhere for a reason. But its popularity has come at a significant cost.

Those same properties that make it so useful are having a detrimental impact on our environment. So we need to rethink our relationship with this material, and move away from the current take-make-waste model to something more sustainable. This is where we can help. Through our plastics recycling service, we work together with customers to turn plastics back into usable resources.

THE 7 TYPES OF PLASTIC WE COLLECT

Polyethylene terephthalate (PET)

e.g. drinks bottles and clothing

High-density polyethylene (HDPE)

e.g. soap containers and milk bottles

Polyvinyl chloride (PVC)

e.g. window frames and drainage pipes

Low-density polyethylene (LDPE)

e.g. shrinkwrap and computer hardware casing

Polypropylene (PP)

e.g. buckets and medical equipment

Polystyrene (PS)

e.g. consumer packaging

Other plastic materials

e.g. nylon, acrylic and polycarbonate

THE BENEFITS FOR YOU:

- * **Breathing new life into materials** – We'll turn your plastics straight back into plastic-based products, helping you to contribute towards a circular economy, boost your recycling rates and meet your sustainability goals.
- * **No limits on quantity** – We're not fazed by quantity; we'll collect anything from a bag of plastic to a large compaction container full.
- * **Total transparency** – From the moment we collect your plastics to the moment they're recycled into new products, we'll know where they are and what's happening to them, and so will you.
- * **Money back** - Depending on the volume, material market and product quality of certain plastics, we can sometimes offer customer rebates and actually give you money back.
- * **Our commitment to quality** - Supporting businesses to recycle products into quality raw materials is our area of expertise, so we can promise you a partnership based on getting the most out of your materials in the most sustainable way.
- * **Ease** – With flexible collection schedules designed to suit your business, and account management on-hand to support you, it couldn't be easier for you to recycle your plastics.

EQUIPPING YOU WITH THE RIGHT STORAGE

To ensure your plastics are stored correctly prior to collection, and in a way that also works for your business, we have a comprehensive range of storage options for you to choose between. From bins to compactors, we'll help you find the right type and quantity to fit your space, plastics output and collection frequency. And, in doing so, we'll ensure you're recycling in a way that's both economical and eco-friendly.

Flexible collections to fit with you

Pre-scheduled/Regular collections

Ideal for businesses who produce a steady stream of plastics, meaning your materials will be collected regularly without you having to think about organising anything.

On-demand collections

Ideal for businesses who generate low volumes of plastics or have peaks and troughs through the year. We can simply collect these as and when you need.

Our services:

Sustainable Recycling and Waste Services

Cans & metals

Cardboard

Plastics

Paper cups

Cartons

Hazardous waste

Non-recyclables

Wood

Non-confidential paper

WEEE

Polystyrene

Glass

Office & warehouse clearances

Confidential Shredding Services

Archive clearances

Hard drives & media material

Confidential paper

Branded products, uniforms & clothing
